# INTRODUCTION

---

Welcome to our second auction of the legendary BCD Library of works on the numismatics of the ancient world. Our first offering of highlights from this library was a tremendous success, with bidders participating from all over the world. Bidding was highly competitive, with many new records being set for prices realized. Strong interest was shown in the major works that are the foundation of any good library on ancient coins, and intense demand was exhibited for rare and obscure works on highly specialized topics. Overall, the sale demonstrated the keen appreciation of students of antiquity for what BCD has accomplished in forming his library.

This second sale is both similar to and different from its predecessor. In scope, it once again covers the entire span of ancient numismatics, with particular emphasis on the coinage of ancient Greece. Offered within, however, are fewer encyclopedic works attempting to encompass the entirety of the subject. While some such works are present here, this sale's main emphasis is on more specialized publications—die studies of individual cities, collections that focus on particular regions, monographs about specific issues. Some of these works date back to the 17th and 18th centuries, while others were published in limited numbers within the last 20 years. Many, of course, date from the classic period of the late 19th and early 20th centuries, when so many groundbreaking works were first published, and when the use of exceptional photographically printed plates was the rule rather than the exception.

There will be future sales. The extraordinary depth of the BCD Library is matched only by its breadth, and even after these two auctions thousands of volumes remain. They will be offered in upcoming Kolbe & Fanning sales so they can augment the libraries of collectors, dealers and academics the world over. Just as the BCD Library assisted students of numismatics while it remained on-site, it will continue to nurture future numismatic study as it is dispersed across the globe. We greatly appreciate your participation in the first BCD Library sale, and look forward to developing your library with our future offerings.

—David Fanning

## ANTIQUITIES & CONSERVATION

### The 1928 Edward Gans Sale

**45** Cassirer, Paul, and Hugo Helbing. *DIE SAMMLUNG EDUARD GANS. ANTIKE SCHMUCKSACHEN UND GEGENSTÄNDE DER KLEINKUNST IN GOLD, EDELSTEIN, HALBEDELSTEIN, GLAS, BRONZE USW.* Berlin, 11. Dezember 1928. Tall 4to, original card covers lettered in gilt. 26, (2) pages; 126 lots; 16 very fine plates. Back cover damp-stained, affecting margins of final plate. Very good. \$150

Rare and important. Hugo Helbing was a brother of the numismatic dealer Otto Helbing, and was primarily an art dealer. The catalogue itself was written by Roland Jaeger. In "The Story of Three Gans Collections," included in the 1981 Summa Galleries catalogue of the Edward Gans Collection of Ancient Jewelry, Gans reflected on the collection offered in this 1928 sale, which "was meant to become a collection of wearable jewelry (hence a number of pieces have modern end pieces and clasps) for my wife, who had been an art dealer and collector in her own right. In the early years of this century she became a junior partner and, later, manager of the firm of Glenk in Berlin, antiquary to the court of Wilhelm II. The idea of further collecting was abandoned in 1926 with the death

of my wife. I bought nearly everything in this collection from Dr. Philipp Lederer in Berlin and in later years from Professor F.R. Martin, Stockholm and Settignano. Several of the pieces originally were part of the second Gans collection. Some of my collection was sold in 1928 (R. Jaeger, *Die Sammlung Eduard Gans* [Paul Cassirer and Hugo Helbin Berlin, December 1928]). But during the auction and on the spur of the moment I decided to buy back almost everything that was not fragile."

A license was issued by the Egyptian government registering Mitry as an antiquities dealer allowing him to include certificates documenting the authenticity of pieces as they were sold. **1665 First Edition of Patin's Introduction**

- 68** Patin, Charles. INTRODUCTION A L'HISTOIRE, PAR LA CONNOISSANCE DES MEDAILLES. A Paris: Chez Jean du Bray, rue Saint Jacques, aux Espics-Meurs et Chez Robert de Ninville, rue de la vieille Bouclerie, à l'Escu de France & de Navarre, 1665. Avec Privilege du Roy. 12mo, 18th-century full brown morocco; both sides paneled in gilt with floral sprays; spine with five raised bands, richly decorated in gilt; red morocco spine label, gilt; board edges decorated in gilt; marbled endpapers; all page edges speckled red. Engraved frontispiece ("Histoire des Médailles") by F. Channeau; (22), 263, (1) pages; finely engraved armorial dedication vignette; woodcut headpieces, tailpieces, decorations and initials; engravings depicting ancient, medieval, and early modern coins and medals in the text. Lacking flyleaves; 1839-dated French summary of the work tipped in; handwritten index on opening and closing blanks. Binding lightly worn, but sound and still rather attractive. Very good or better. **\$300**

The scarce first edition of Patin's excellent introduction to numismatics. Though perhaps not his most important work from a scholarly perspective, it was arguably his most influential. The copy at hand is likely the second of the two printings to appear in 1665, the other being by Jean du Bray with Pierre Varquet. Of Patin, his time, and his works, Ferdinand Bassoli writes: "The new renaissance of numismatic publications came only after 1650. It was on the whole a French renaissance, reflecting both France's political and cultural progression, and the competence of its learned men and academies in the fields of philology and history in the wider perspective of European culture. In chronological order, the first champion of this French revival is Charles Patin (1633–1693). He was definitely no *clericus*, but a doctor of varied interests who led such a restless life that in the end he left France and ended his days at Padua, where he taught surgery. His remarkable ability in the field in which we are interested is showcased not only by his successful revival of Fulvio Orsini's sixteenth century work on Roman family coins but, above all, by two other works. The first is his *Introduction à histoire par la connaissance des médailles* of 1665, the second is a book on bronze Roman imperial coinage published in 1671, *Imperatorum Romanorum numismata ex aere mediae et minutae forme*." A superb, wide-ranging, appraisal of this fascinating numismatic author and his time is provided in a wider context in C.E. Dekesel's 1990 *Charles Patin: A Man Without a Country*. Babelon 100. Banduri (1719) 91. Bassoli 28. Brückmann (1729) 106. Dekesel P38. Engel & Serrure 4867. Hirsch 101. Lipsius 308. Van Damme 360.

**A 1691 Expanded Edition of Patin's Introduction**

- 69** Patin, Charles. INTRODUCTION A LA CONNOISSANCE DES MEDAILLES. [bound with, as always] Patin, Charles. EMBLEMES ET DEVISES DE LA MAISON ROYALE. Troisième édition. Padove: Avec permission des Supérieurs, 1691 [second work retaining 1660 date]. 12mo, somewhat later full vellum; spine with three raised bands; red morocco spine label, gilt. (24), 292 pages [complete, pages 169–172 never being present]; engraved allegorical frontispiece ("Histoire des Médailles") by M. Desbois after F. Channeau [included in collation]; printed title with engraved printer's device; engraved armorial headpiece at head of dedication leaf; woodcut headpieces, tailpieces and initials; textual engravings of coins and medals; engraved vignette on second title. Binding a little worn and discolored; contents fine. **\$300**

A well-printed later edition, on fine paper. The *Introduction* was the most popular work written by this prolific and talented numismatic author. First printed in 1665 (see above), editions were being published as late as 1771 (see following). Later editions are usually found with the author's early work on the emblems and devices of the French royal family appended. Babelon 100. Bassoli 28. Dekesel P64. Engel & Serrure 4867. Lipsius 308. Ex Amadeo Svajer (1727–1791), with his engraved bookplate.

**The Rare Final Edition of Patin's Introduction**

- 70** Patin, Charles. HISTORIA DE LAS MEDALLAS, O INTRODUCCION AL CONOCIMIENTO DE ESTA CIENCIA. Madrid: Imprenta de la calle de Barrio-Nuevo, 1771. Con Licencia. 8vo [15 by 10 cm], contemporary full limp vellum; hand-lettered spine. (10), 278, (2) pages; unsigned engraved allegorical frontispiece ("Historia de las Medallas") after F. Channeau [included in collation]; woodcut headpiece and initial; textual engravings of coins and medals. Lacking front flyleaf; hinges reinforced; binding somewhat discolored; occasional marginal discoloration and faults. Very good or so. **\$300**

The final edition, and apparently the only 18th-century edition. Translated into Spanish by D. Francisco Perez Pastor. Rare: the Dekesels cite only two copies of this edition in the libraries they consulted. Babelon 100. Bassoli 28. Dekesel P53.

An unusual and very rare publication, possibly the only complete copy we have handled. Includes sections on Greek, Roman, Jewish, Bosphoran and Chersonese coins. There are also sections on gold production, the reduction of the value of gold and silver, and Polish coins. The incomplete copy in our 2014 auction of the Quentin Archer Library brought \$750 hammer. Yakovchuk 264.

Ampius Balbus und die Aera der Provinz Asia," "Fränkische im Orient geprägte Münzen : die Münzen der Familie Gattilusio von Lesbos und Phocaea," and others. Babelon 187. Leitzmann 105.

## The Best Edition of Pinkerton

- 73** Pinkerton, John. AN ESSAY ON MEDALS: OR, AN INTRODUCTION TO THE KNOWLEDGE OF ANCIENT AND MODERN COINS AND MEDALS; ESPECIALLY THOSE OF GREECE, ROME, AND BRITAIN. Third edition. London: T. Cadell et al., 1808. Two volumes, complete. 8vo, contemporary matching brown speckled calf; spines ruled in gilt with red spine labels, gilt; board edges hatched in gilt. xliv, (4), 376 + (8), 448, (18) pages; 3 + 3 plates. Bindings somewhat worn and rubbed at extremities; discoloration from removed spine labels. Very good. **\$100**

Pinkerton's popular work, in a somewhat worn, but sound contemporary binding with unidentified armorial bookplates. The book remains of interest today. He covers topics that the more scholarly tomes of the era neglected, including the basics of assembling and caring for a collection of coins. This third edition is considered the best. Leitzmann 105. Manville 60–61. Sigler 101.

- 123** Star Company. THE OLD COIN NEWS, PUBLISHED IN THE INTEREST OF NUMISMATICS. Volume I, Nos. 1–12. New York, 1930. 8vo, original red pebbled cloth, gilt (see comments). iv, 91, (1) pages; text illustrations; 30 plates of coins printed on thick card stock. Near fine. **\$100**

Seemingly a special edition of the first volume of this publication, with the binding carefully replicating the mast-head's font on the spine and reproducing its logo on the front cover. As such, the only copy we recall seeing. A brave, well-executed attempt to popularize the collecting of foreign and ancient coins and medals in this country. Mainly comprised of a thousand or so listings of coins, medals, and numismatic books for sale, several interesting articles are also appended, one by Ragnar Cederlund entitled "The Necessity Coins of Landau, 1702." American coins are not neglected: patterns, including "AR. 1804. 10 dollars. Reeded edge. (Regular Dies.) A. W. No. 23" at \$500, and various other regular issue pieces and medals are offered for sale. Also appended are reprints of sections of Doughty on cents and Maris on New Jersey coppers. The generally well-executed halftone plates depict Russian, British, and a great many desirable coins from throughout the world. Ex Cleveland Coin Club, with their stamp; ex Ray Byrne Library, with his bookplate.

# ANCIENT COINS

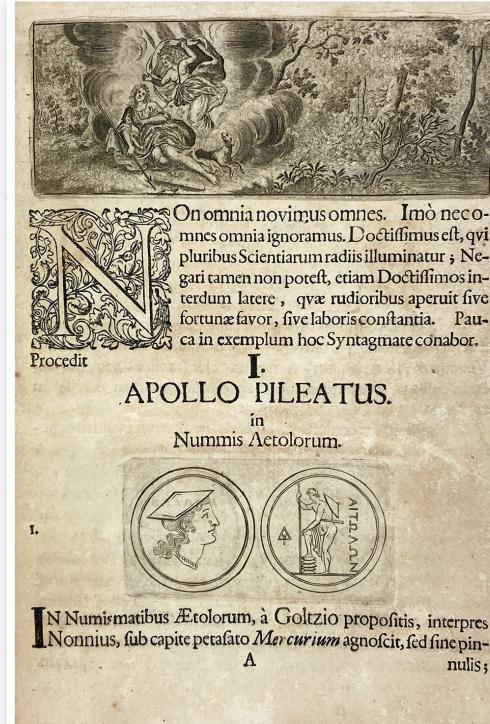

*A Note from the Collector:* This is the right place to mention the importance the so-called Antiquarian reference books had for this collector. Ancient Greek and Roman Provincial coin engravings were the library's acquisition prerequisites. These, of course, varied in quality and also, which is of paramount importance, in how close they could come to providing images that could be matched to actual, specific coins. Close inspection of some of these engravings and subsequent comparison to published photographs of various public and private collections would, on rare occasions, provide unexpected surprises. Also, the possibility of matching a coin in the hand with its own engraving of some centuries past, would always be there—and what a priceless gift that would be for the owner!

## GENERAL WORKS

### Beger's 1691 *Observationes*

**148** Beger, Laurenz. OBSERVATIONES ET CONJECTURÆ IN NUMISMATA QUÆDAM ANTIQUA... Coloniae Brandenburgicae (Berlin): Typis Ulrici Liebperi, 1691. Small 4to [24 by 19 cm], later brown quarter calf with yellow sides; spine with five raised bands; two spine labels, gilt, one of them misdated. (24), 61, (1), (150) pages; engraved title vignette; finely engraved headpieces, tailpieces and initials; engravings in the text, mostly depicting ancient coins. Contents somewhat browned, as seems usual; front cover with modern note written on it in ink. Very good. **\$200**

Scarce. An important numismatist, Beger also wrote a comprehensive three volume catalogue of the ancient coins in the cabinet of the Electors of Brandenburg. Dekesel B67 (stated collation is erroneous). Hirsch 10. Lipsius 31.

**1832 Oxford Lectures on Ancient Coins**

**149** Cardwell, Edward. LECTURES ON THE COINAGE OF THE GREEKS AND ROMANS DELIVERED IN THE UNIVERSITY OF OXFORD. Oxford: Printed by S. Collingwood for John Murray, 1832. 8vo, original green boards; spine with printed label. xvi, 238 pages. Inscribed by the author to B.P. Symons. Spine worn; very good. \$100

Scarce. The author was Camden Professor of History. He focuses on the “important knowledge contained in [coin] inscriptions,” and also includes an interesting review of the earlier literature. Of Pinkerton’s famous *Essay*, he notes “faults arising from the peculiar temper of the writer”; he observes that even Eckhel’s landmark *Doctrina Numorum* “is gradually losing its estimation as a perfect work, under the influence of more recent discoveries”; and of Rasche’s monumental *Lexicon*, he writes that it “exhausted so completely the existing sources of information, that it carefully preserved all their impurities.”

It was he who, as librarian of the Royal Theresianum College in Vienna, edited the first large-scale publication of the Royal Imperial Hapsburg museum in 1755" (*Antiquarian Books on Coins and Medals*, page 35). EXERCITATIO PROOEMIALIS DE NUMIS ALIQUOT GRÆCIS, QUI AD IMP. NON PERTINENT: FAMILIARUM ITEM: AC POSTREMO URBIS ROMÆ, SENATUS, ET POPULI. Norimbergæ: Sumtibus Joan. Adami Schmidii, 1735. 4to [21 by 17 cm], contemporary full tan calf, sides bordered in blind; spine with five raised bands, ruled and decorated in gilt; red morocco spine label, gilt; marbled endpapers; all page edges red. (16), 190, (18) pages; woodcut initials and tailpieces; 6 + 1 engraved folding plates of coins. Binding rubbed and professionally repaired at front fore-edge and lower corner. Contents near fine. **\$300**

The first edition. Rare: while we have sold Hanthaler's expansion of the 1750s before, this may be the first time we have offered the 1735 edition. Hanthaler (1690–1754) was a Cistercian monk at Lilienfeld Abbey who conducted significant research in the fields of numismatics and Austrian history. His *Exercitationes faciles* were addressed to amateur collectors rather than fellow scholars, which in part explains both their scarcity and obscurity today. They remain quite interesting, however, especially if taken from the point of view of the development of coin collecting as a leisure pursuit. Dekesel H72. Lipsius 172.

**159** Jobert, Louis. LA SCIENZA DELLE MEDAGLIE ANTICHE E MODERNE, PER AMMAESTRAMENTO DELLE PERSONE LE QUALI SI APPLICANO AD AVERNE LA NOTIZIA, CON NUOVE SCOPERTE FATTE IN QUESTA SCIENZA. OPERA TRADOTTA DAL LINGUAGGIO FRANCESE NELL'ITALIANO DA SELVAGGIO CANTURANI. In Venezia: Per Lorenzo Bazeggio, 1728. 12mo, contemporary thick cardstock covers in semblance of vellum; hand-lettered spine. Engraved frontispiece depicting two coin collectors seated before an opened coin cabinet; (16), 454 pages; engraved printer's device on title; 11 engraved plates of coins. Binding worn; with joints cracked; some stitching coming loose; very good or so. \$100

An attractively printed Italian edition of this famous introduction to numismatics, originally published in French in 1692 but translated into many European languages in the late seventeenth and early eighteenth centuries. One of the earliest general guides to coin collecting, it was immensely popular. The author amassed a wealth of useful information, including notes on counterfeiting and how to identify counterfeit coins. There are also chapters on the formation of a coin collection and on coin conservation. Dekesel J35. Hirsch 66. Lipsius 202. Modesti 1480.

**Rare Series of Embossed Coin Plates**

**160** Kimball & Co., Wm. S. ALBUM OF ANCIENT COINS. Rochester, undated [c. 1880–1890]. Oblong 12mo [17.5 by 11 cm], original pictorial card covers with embossed illustrations. 12 plates on thick stock featuring coin illustrations with brief descriptions, printed in relief and in metallic tints. Contents loose, lacking silk tie which once secured the set at the top. Complete, and housed in custom-made chemise and slipcase. Near fine. \$150

A rare embossed coin publication. The illustrations, executed by a competent artist, are visually quite appealing. William S. Kimball, proprietor of Peerless Tobacco Works, was one of the leading American cigarette manufacturers in the second half of the 19th century. Their products were promoted by the issuance of cigarette cards and tobacco cards depicting "Fancy Bathers" and other less provocative images, among them the series on ancient coins present here. The large format of the cards in this album indicates that the cards were included in tobacco tins. When a run of cards was complete, the company issued albums of complete sets such as the one at hand. Complete albums are rarely encountered.

## Manuscript of Ancient Coins at Naples

**224** [Naples]. Gardiner, Samuel Weare, after Erasmo Pistolesi. DESCRIZIONE DI ANTICHE MEDAGLIE ESISTENTE NEL REAL MUSEO BORBONICO. Naples, 1842. 8vo, contemporary brown calf-backed mottled boards with brown calf cover label bordered and lettered in gilt. 31 leaves, with neatly written manuscript on most pages; 14 finely engraved plates of coins, mostly signed by Andr. Russo. Binding somewhat worn and rubbed, but sound; interiors nearly fine and fully legible. \$500

An intriguing volume. Bearing the neat signature of Samuel Weare Gardiner, and dated 1842, the text throughout seems largely derived from Erasmo Pistolesi's *Real Museo Borbonico descritto ed illustrato*, from which the plates also appear to originate. Pistolesi's volume, however, was not published until 1843, and while the plates are identical, the text bordering them differs. Andrea Russo also produced the plates for Pistolesi's *Il Vaticano descritto ed illustrato*. Gardiner (1821–1866), of St. Marylebone (later Oxford) was a magistrate and deputy lieutenant for Oxon, having served as High Sheriff of Oxon in 1849. A fascinating volume deserving of research.

Very scarce. The first edition appeared in 1771. François De Callatay published an article on Leblond (as his name is generally given) and his correspondence with Joseph Eckhel in the 2013 volume of the *Comptes rendus des séances de l'Académie des inscriptions et belles-lettres*. Pellerin is best known today for his *Recueil de médailles*, published between 1762 and 1770 in what turned out to be, with various supplemental works, eleven volumes. Babalon considered him a forerunner of Eckhel, as his classification was based on geographical arrangement rather than alphabetical. Babalon 120. Lipsius 48.

Upon his arrival in Constantinople in 1781, the English Ambassador Robert Ainslie went to consult him and later formed his own collection. One of Sestini's final journeys was to Hedevar, near Vienna, to see the Comte de Wiczay's coin cabinet which was, at a later date, the subject of a catalogue by Caronni. Sestini was the Vaillant of the nineteenth century; even if he lacked Eckhel's erudition and, moreover, the learned Jesuit's accurate criticism, his descriptions of the various different collections he saw have proved to be a valuable source of information, and are still consulted to this day." Clain-Stefanelli 3425. Daehn 888: "Explores the facing head design on Greek coins. States that the facing head, in full-front or three-quarter view, developed independently in many places. Argues that the facing head did not originate in the gorgoneion type as is sometimes claimed. Emphasizes that most of the full-front view coins belong to the archaic period; later coins show the head turned slightly to the left or right. Describes 363 facing-head types, many of which are illustrated."

## GENERAL WORKS

### Map & Plate Volume for Anacharsis's Voyages

**321** [Anacharsis]. Barbié du Bocage, Jean-Denise. MAPS, PLANS, VIEWS AND COINS, ILLUSTRATIVE OF THE TRAVELS OF ANACHARSIS THE YOUNGER IN GREECE, DURING THE MIDDLE OF THE FOURTH CENTURY BEFORE THE CHRISTIAN ÆRA. London: Printed for G.G.J. and J. Robinson, Paternoster-Row, 1791. Small 4to, contemporary tan quarter calf with marbled sides; spine with five raised bands, ruled in gilt; red spine label, gilt. 51, (1) pages; 31 finely engraved maps, plans, views and plates, some of them double, some of them folding, some of them tinted by hand. Binding worn at extremities, but sound. Very good. **\$200**

An early cartographic companion to Barthélemy's *Voyages*, the famous account of the travels of Anacharsis through different lands, which was first published in 1788 by Jean-Jacques Barthélemy. Anacharsis (a fictional figure) is a fourth-century Scythian descended from the sixth-century philosopher of the same name. That book reads to us today as an unusual combination of a historical novel and an encyclopedia; while fictional, it draws heavily upon the author's erudition and antiquarianism and did much to foster a renewed enthusiasm for Classical Greece in the late eighteenth and early nineteen centuries. The final plate in this edition depicts four *Coin from the Cabinet of the King of France* illustrative of the work. Dekesel B103 (under Barthélemy). Lipsius (supplement) 14.

Finely engraved frontispiece portrait of Barthélemy; iv, 106, (2) pages; large folding hand-tinted map; 38 additional plates [numbered 3–39 plus a 19\*], many double-page, comprising plans, maps [some hand-tinted], finely engraved views, and a finely engraved plate of coins. Plate 13 misnumbered 11. Minor occasional spotting; near fine. **\$300**

An attractive example of this scarce and interesting volume.

### A Finely Bound Copy

**323** [Anacharsis]. Dumersan, T.M. NUMISMATIQUE DU VOYAGE DU JEUNE ANACHARSIS OU MÉDAILLES DES BEAUX TEMPS DE LA GRÈCE... OUVRAGE PUBLIÉ PAR C.P. LANDON... Rear lower joint cracked; near fine. **\$300**

### *Greek Coins in Historical Context*

**328** Dompierre de Chaufepié, H.J. de. GRIEKSCHE MUNten IN HISTORISCHE ORDE GERANGSCHIKT. Haarlem: H. Kleinmann & Co., (1900). Printed portfolio [33 by 24 cm], with ties. 24 pages, as gathered in three signatures, as issued without title leaf; 15 *Lichtdruck* plates of coins with tissue guards, laid in loosely as issued. Bilingual: Dutch and French. First and last page toned. Institutional stamp to verso of front portfolio board. Near fine. **\$100**

Very rare. Henri Jean de Dompierre de Chaufepié (1861–1911) began his career in 1889 working with the engraved gems and Greek coins at the Koninklijk Penningkabinet. In 1892, he was appointed a conservator at the Museum van Oudheden te Leiden, but returned to the Royal Coin Cabinet the following year as director. He published in a number of numismatic fields, but became best known for his effort in promoting modern medallic art through publications such as *Catalogus der Nederlandsche en op Nederland betrekking hebbende Gedenpenningen* (1903–1906) and the magnificently printed and illustrated *Les médailles et plaquettes modernes* (1899–1907). This 1900 work on ancient Greek coins is printed on fine paper and features good quality illustrations, typical of the author's work.

This French translation, by Jean Babelon, of *Die griechische Münze* is not noted by Grierson. It retains the same magnificent illustrations found in the original 1964 German edition and also the English version of this indispensable work—Kraay & Hirmer's *Greek Coins*—published as well in 1966. Of the three, this edition appears to be the least available. A landmark work in numismatic book illustration, filled with useful and important information. Clain-Stefanelli 1824.

## Goltzius on Greece, the Islands & Asia Minor

- 330** Goltzius, Hubertus. HUBERTI GOLTZII DE RE NUMMARIA ANTIQUA, OPERA QUÆ EXTANT UNIVERSA... TOMUS TERTIUS. CONTINENS GRÆCIÆ, EI-USQUE INSULARUM ET ASIÆ MINORIS NOMISMATA... Antwerp: Hendrik Verdussen and Corneel Verdussen, 1708. Folio [36 by 23 cm], contemporary full vellum; sides intricately paneled in gilt with floral sprays; spine ruled, lettered and decorated in gilt; all page edges gilt. (8), 326, (14) pages; 38 + 28 (in 21) + 5 engraved plates. Lacks printed title and engraved frontispiece; half titles to plates present; woodcut initial. Staining to upper spine corner throughout, not affecting utility; some spotting; rear cover discolored. Very good or so. **\$300**

A noted Dutch scholar and engraver, Hubert Goltz was a major influence in the early evolution of numismatics. His series of five folio works on ancient Greek and (mostly) Roman coins remained standard references for two centuries. This is the third of these volumes, and is devoted to mainland Greece, the islands and Asia Minor. Christian Dekesel (*Hubert Goltzius: The Father of Ancient Numismatics*, 1988) discusses the variations between the 1645 and 1708 editions in some detail and notes that "The influence of Hubertus Goltzius upon numismatics is mostly underestimated. One forgets very easily that he was the first author who wrote and published a comprehensive view upon the coinage of the Ancients and that he was also the first to do that on the basis of a real contact with some of the great coin cabinets of the civilized Renaissance world." Ernest Babelon wrote that "Hubert Goltz contributed more than any of his contemporaries to the spread of interest in numismatics. His work on the classification and attribution of coins was vital in laying the foundation for a sound critical analysis" (*Ancient Numismatics and Its History*, 75). Brückmann (1729) 50. Brunet column 1654: "Les différentes éditions de ces Images sont remarquable par le tirage en couleur des belles planches sur bois qui les décorent." Dekesel G159. *Hubertus Goltzius en Brugge*, item 81. Lipsius 153–154.

### Kinns & Raven on Delphic Coinage

- 397** Kinns, Philip. THE AMPHICTIONIC COINAGE RECONSIDERED. London: *Numismatic Chronicle*, 1983. 22 pages; 4 plates of coins. [bound with] Raven, E.J.P. THE AMPHICTIONIC COINAGE OF DELPHI, 336–334 B.C. London: *Numismatic Chronicle*, 1950. 22 pages. Two works, bound in one volume. 8vo, later tan quarter morocco; spine with two raised bands, lettered in brown; brown endpapers; original printed card covers to first work bound in. Fine. **\$100**

Two groundbreaking articles on the Delphic coinage of the Amphictyonic League. Kinns is Daehn 3959: "This article builds on the study of E.J.P. Raven and utilizes subsequent research on the Delphic treasurers' accounts. The new catalogue comprises twenty-six staters (struck from seven obverse and twelve reverse dies), three drachms (one obverse, two reverses), and two hemidrachms (two obverses and two reverses). The original number of stater obverses undoubtedly did not exceed nine. Detailed reconsideration of the epigraphical evidence indicates that the total value struck was between 125 and 175 talents, and probably 80% of that was coined as staters. Calculations of survival rate and die output entail the conclusion that, for this issue, the minimum average output of each stater obverse die was 23,333 coins. An appendix lists modern struck and cast forgeries of the staters and drachms." Raven is Clain-Stefanelli 2559. Daehn 3962.

## ROMAN COINS

### GENERAL WORKS

#### Morell's First Attempt at a Universal Catalogue

**465** Morell, André. SPECIMEN UNIVERSÆ REI NUMMARIAE ANTIQUÆ, QUOD LITERATORUM REIPUBLICÆ PROPONIT ANDREAS MORELLIUS HELVETUS. Parisiis: Apud Thomam Moette, 1683. First edition. 8vo [19 by 12.5 cm], later tan full morocco; spine with two raised bands, lettered in brown; brown endpapers. 136, (2) pages; 18 engraved plates of ancient Roman coins. Lacking title and preliminary leaves, main text complete. Binding rubbed; minor interior spotting; generally near fine. \$200

The very scarce first edition. André Morell (1646–1703) was chosen to catalogue the vast collection of Louis XIV. As Babelon relates the story, "Encouraged by Vaillant, Spanheim, Noris, and other scholars, Morell took on the task of publishing not only the Cabinet du Roi, but also a general catalogue of every ancient coin in Europe, planning to produce a drawing of each coin, with an accompanying description. Morell began work on this vast labour, reviving Lazius's attempt, in 1683, under the title *Specimen universae rei nummariae antiquae*. In the first edition, the author announced that he would include drawings and commentaries on 20,000 coins; in the second edition, he said that he would exceed 25,000." The two editions of the present volume, however, are as far as this monumental project progressed. Babelon 109–110. Banduri (1719) 123–124. Brückmann (1729) 78. Dekesel M148. Hirsch 88. Lipsius 267. Van Damme 364.

#### Diamilla-Müller's 1853 Numismatic Memoirs

**466** Müller, D.D. MEMORIE NUMISMATICHE DI C. CAVEDONI, B. BORGHESI, DIAMILLA-MÜLLER, CAPRANESI, MATRANGA, AUDIERNE, VISCONTI, GIORDANI, EC., EC. Parigi: A. Leleux, 1853. 4to, later full tan morocco; spine with four raised bands, lettered in brown; brown endpapers. 126, (2) pages; 7 engraved plates, some of them signed by R. Bullica. Intermittent staining and wrinkling; first leaf with repaired corner. Very good. \$300

A rare collection of essays and excerpts on (primarily Roman) numismatic topics. D.D. Müller was the penname

of Demetrio Diamilla (1826–1908), who was imprisoned and exiled in the aftermath of the Roman Republic, after which he began publishing under his wife's name. He had published a periodical, *Memorie numismatiche* in 1847, of which this collection was intended to serve as a *seconda edizione*. He is best known today for having been a secret agent for the House of Savoy and the author of *Politica segreta italiana*.

## Patin's 1683 Catalogue of the Mauroceno Collection

**467** Patin, Charles. THESAURUS NUMISMATUM, ANTIQUORUM & RECEN-  
TIORUM, EX AURO, ARGENTO, & ÆRE, AB ILLUSTRISS. & EXCELLENTISS. D. D.

TUS. Venetiis: Ex Typographia Jo. Francisci Valvasensis, 1683. 4to [23.5 by 17 cm], con-  
temporary vellum; spine with four raised bands, somewhat later red spine label, gilt. Finely  
engraved frontispiece signed by Dorigni and Desbois; 148 pages; engraved title vignette;  
engraved dedication vignette; woodcut headpieces, tailpieces and initials; numerous large  
engravings of Roman provincial coins in the text. Lacks front flyleaf; binding darkened;

## Annotated by August Voirol

Bundes-Realschule in Graz, Veröffentlicht am Schlusse des Schuljahres 1931/32, 1932. 8vo, contemporary brown boards; red spine label, gilt. 58, (2) pages, interleaved; 2 fine *Lichtdruck* plates depicting ancient Greek and Roman coins. Annotated throughout, particularly on the interleaves, by Dr. August Voirol. Binding a bit weak. Very good. \$300

A rarely encountered work, with two high-quality plates. This copy is notable for having been extensively annotated by Dr. August Voirol. Stefan's work is perhaps most important on the subject of metrology (the spine label made for this copy reads *F. Stefan Metrologie d. antik. Münzprägung*), and Voirol's annotations are primarily on this subject. Dr. August Voirol (1884–1967) was a gynecologist in Basel who began collecting in the 1930s and had, by the end of the decade, become so involved with the field that he joined the firm of Münzen und Medaillen as a board member. A founder of the Circulus Numismaticus Basiliensis, he remained active in collecting circles for the rest of his life.
